

# PIGSTY

# PostgreSQL In Great STYle

PG18 supported!

PIG

# The missing package manager for Postgres & Extensions

# Install PostgreSQL with **414** extensions on mainstream Linux Distro!

<https://github.com/pasty/pig>

# PG EXPORTER

# The ultimate metrics exporter for PostgreSQL & Extensions

# Get all the metrics from Postgres / PgBouncer / Extensions with 50+ collectors!

[https://github.com/pastv/pg\\_exporter](https://github.com/pastv/pg_exporter)

# PGConf.dev 2025

## Battery-Included, Local-First PostgreSQL Distribution as an Free & Better RDS Alternative

# 414 Extensions

## 9 Kernel Forks

HA / PITR

# Observability

# LB & Pooling

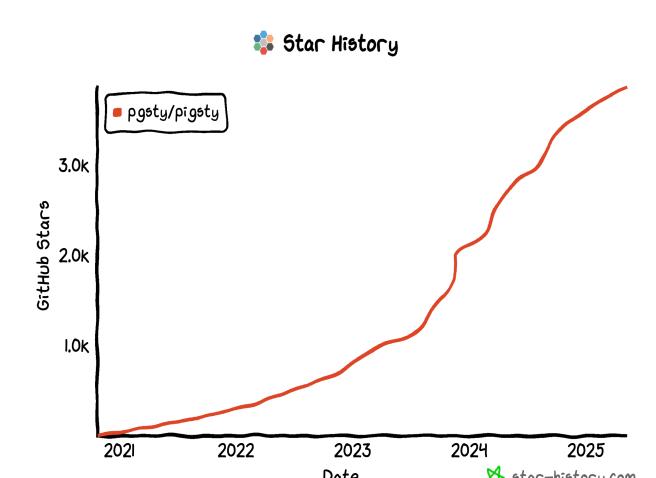

# Local Repo

# Infra as Code

# No Docker/K8S

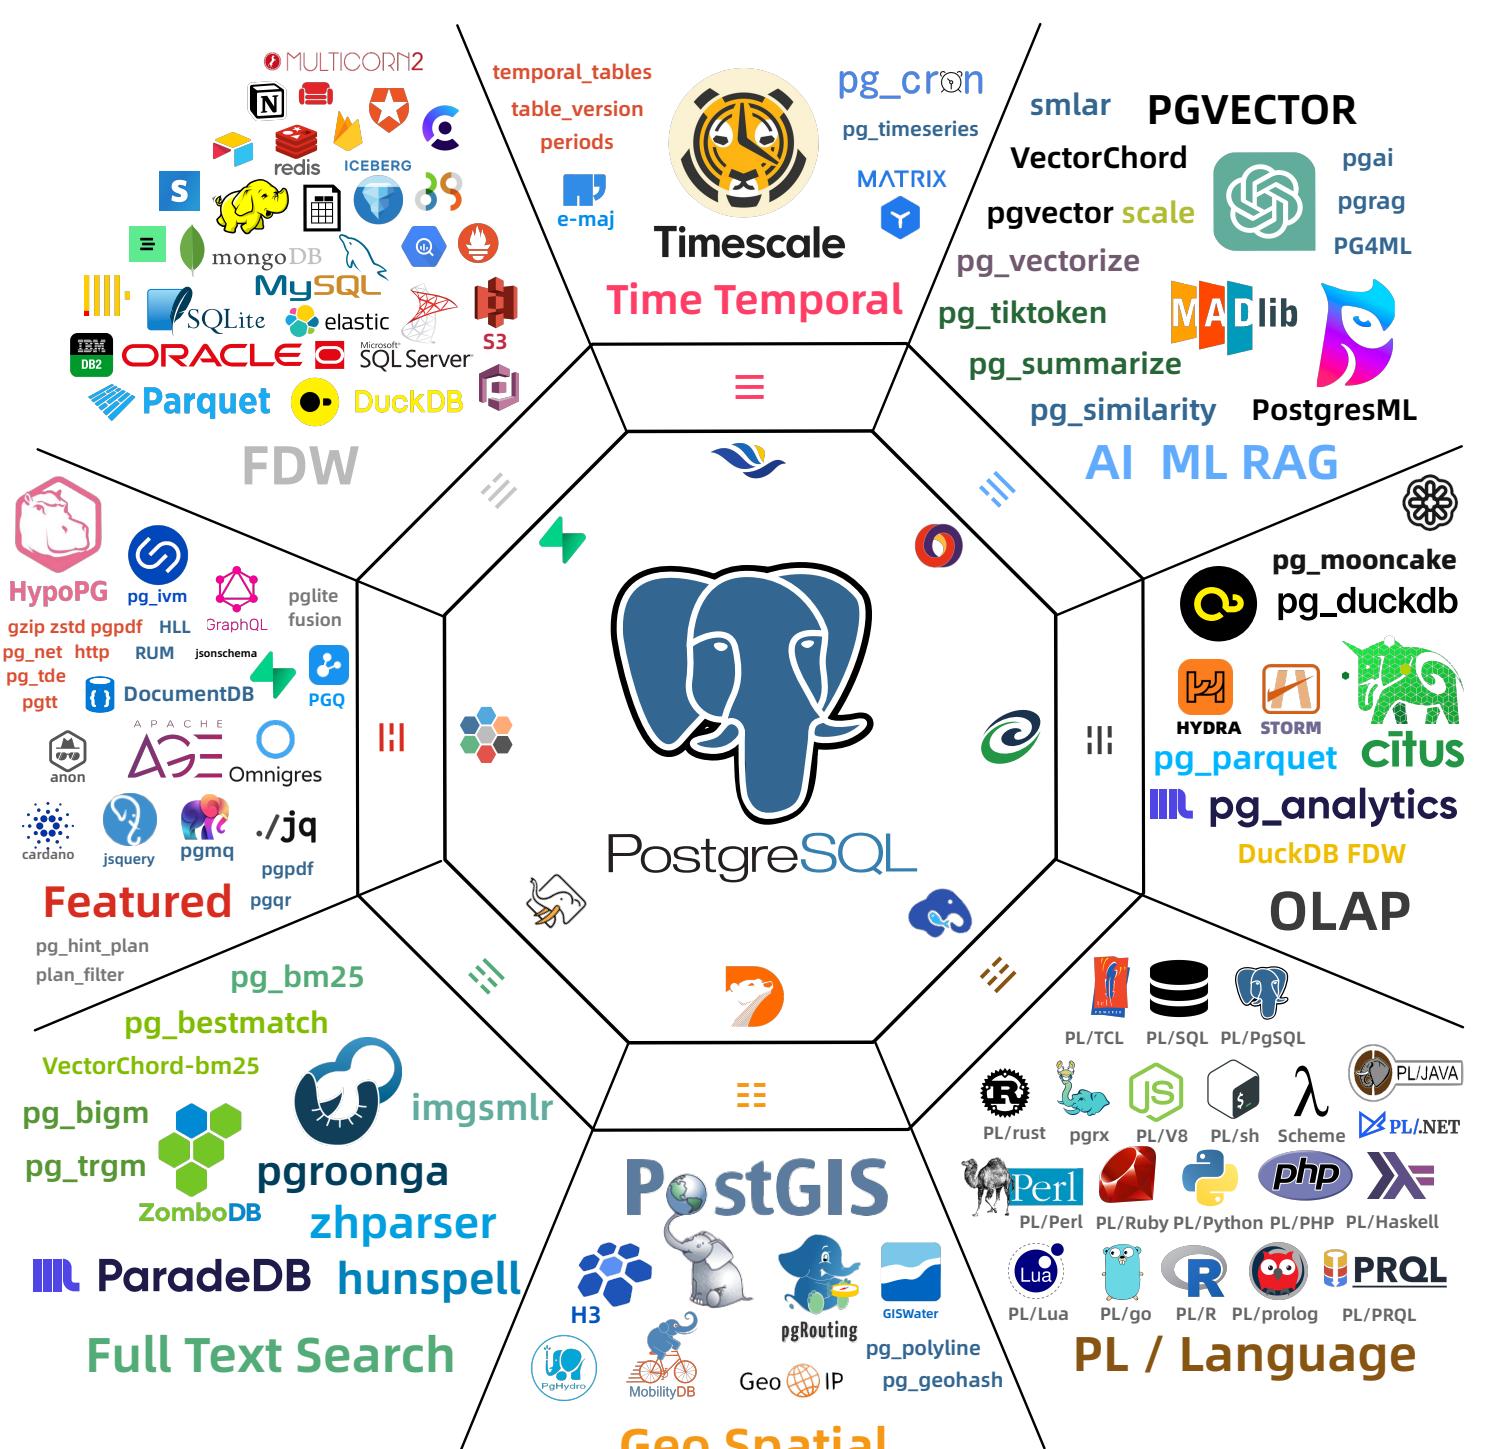

# Run Supabase

**PostgreSQL (Vanilla)**  
**Citus (Distributive)**  
**Babelfish (MSSQL)**  
**PolarDB (Aurora)**  
**IvorySQL (Oracle)**  
**OrioleDB (OLTP)**  
**OpenHalo (MySQL)**  
**FerretDB (MONGO)**  
**Supabase (FIREBASE)**

# Turn PG Kernel into Free RDS !
